

Assignment 7

Write a web API for the project you did.

Task 1 - Write an API for post List that have comments and like/dislikes in them. The posts are sorted based on the votes on the posts. If 2 posts have same amount of upvotes, then the latest post will be on the top. (Only the logged in user should get the list).

Task 2- Write an API for Creation of post. (Only the instructor can create the post)

Task 3- Write an API for commenting on the post. (Only the logged in user should comment on the post)

Task 4- Write APIs for editing and deleting of Post. (Only the owner of the post can edit/delete the post)

Task 5 - Write APIs for editing and deleting of Comment. (Only the owner of the comment can edit/delete the comment)

Task 6 - Write APIs for upvoting/downvoting of the post. (Only the logged in user should vote on the post)
